Inox First stockpot 28 cm stainless steel with encapsulated aluminum base in mirror finish with lid

The stylish Inox First stockpot by Pujadas produces stellar results. Manufactured with sophisticated all-over technology, this stainless steel pot features an encapsulated sandwich base with a magnetic stainless steel bottom for induction compatibility. The inside is completely filled with a thick layer of aluminum, with no empty cavities, which allows for faster and more even heat distribution all the way to the edges. This all-over technology prolongs the life of the pot, as it prevents food, water and soap residue from building up, which would eventually cause damage.
